

# S I M P L Y CLEAN®

## Revolutionary Single-Pass Wash System - The Future of Fresh Cut

- Line Design
- Water Purification
- Sanitizing Agent

- Single-pass sanitizing spray
- Exudate-free wash water
- IEH validated

### Revolutionary Line Design

Simply Clean® uses **ultra-pure, single-pass sanitizing** water for superior finished product results.

#### Our comprehensive system:

- **Eliminates** recirculated water as a media for cross-contamination
- **reduces** the amount of sanitizing chemicals needed
- **increases** sanitizer strength delivered to finished product
- **broadens** the range of pathogens sanitized

### Water Purification

- **Sustainable** - minimum of 50% reduction in water consumption
- 7-step water purification process
- Double pass reverse osmosis includes UV and chlorine treatment at final stage for zero microbial risk
- 100% control of input water used for wash process

### Sanitizing Agent

- Tighter chemical control
- Compatible with various sanitizers, including chlorine dioxide
- 10x-20x the sanitizing power with 1/20th the chemical usage on high organic items
- Effective on broader range of bacteria, including gram-positive organisms such as Listeria

### Results

Less exudate on finished product

Finished product in distilled water
